For ensuring safe and nutritious food (by reducing food waste and responding to global challenges)

Complex Stages of Food System

Production, Distribution, Marketing and Consumption

Learning partnership and Platforms

Focusing on engaging cities from commonwealth and beyond

— Opportunities and Challenges

Opportunities

- The issues and real scenario would be evident from this area for regional cities
- Further gap analysis and suggestions can be proposed
- First hand experience of how the system works in real
- Introductions to national and international policy makers and agencies to support food policy development and implementation

Challenges

- To make the officials understand about what will be their responsibility to work the idea of food system.
- Working after managing the tension between municipality and sub-district level office
- Power issues and hierarchy management
- The Covid Situation
