OUR DIETS ARE INFLUENCED BY LOTS OF DIFFERENT FACTORS THAT MAKE UP THE FOOD ENVIRONMENT

OUR DIETS ARE INFLUENCED BY LOTS OF DIFFERENT FACTORS THAT MAKE UP THE FOOD ENVIRONMENT

Ours and diet-related diseases are reaching catastrophic proportions

2016
25% of adults are obese

£6.1 billion cost to NHS

2050
50% of adults will be obese

£9.7 billion cost to NHS

The experts concluded that England is not doing well on

- Controlling the advertising of unhealthy food to children
- Strengthening planning laws to discourage fast food
- Listening to civil society
- Supporting systems for monitoring obesity- and diet-related diseases and risk factors
- Labelling packaged foods
- Allowing public access to key government documents on food strategy
- Developing national dietary guidelines
- Adopting school food standards

The experts judged that England is doing well on

- Considering health in food and farming strategies
- Subsidising farmers to produce healthier food
- Adopting school food standards
- Labelling packaged foods
- Allowing public access to key government documents on food strategy
- Developing national dietary guidelines
- Implementing the levy on sugary drinks

10 priority actions that experts think could significantly reduce obesity- and diet-related diseases

- Reduce the sugar, fat and salt content in processed foods
- Prioritise health and the environment in the 25-year Food and Farming Plan
- Monitor the food environment
- Apply buying standards to all public sector institutions
- Evaluate food-related programmes and policies
- Control the advertising of unhealthy food to children
- Monitor school food standards
- Adopt a national food action plan
- Strengthen planning laws to discourage fast food
- Implement the levy on sugary drinks

Learning from experience in the UK and abroad

Advertising of unhealthy food to children

Quebec bans all food advertising aimed at children under 13 years. French speaking families in Quebec are 19% less likely to consume fast food than their counterparts in Ontario.

Health in food and farming plans

Scotland will launch the consultation on a Good Food Nation Bill in 2017. It promises to address procurement, waste, health, education and social justice. It is intended to enhance the National Food Policy.

Monitoring school food

Sweden monitors the quality of school meals with an online tool which allows schools and municipalities to evaluate their school food provision in six areas: choice, nutritional quality, safety and hygiene, educational resource, environmental sustainability, organisation and policy. Currently 91% of all primary schools have started to use the system.

Sugar, fat and salt content of processed foods

The UK introduced voluntary salt-reduction targets for a range of processed foods in 2006. Many foods now have 10–20% less salt than 10 years ago, while salt intake has fallen by 11%. Less progress was made with foods eaten out of home. It is important to build on this experience in the new sugar reformulation plan.

Levy on sugary drinks

France introduced a ’soda tax’ in 2012. It is €0.11 per 1.5 litres of soda and raises around €400m a year for the general budget. Demand for soft drinks reduced by 3.3% in 2012 and 3.4% in 2013 following the introduction of the tax.
