

Compass Group 2019 Pledge

This is a UK-wide pledge

1

This commitment will be implemented by October 2020.

Compass Group UK and Ireland pledge to undertake the following activity:

- Increase procurement volumes of vegetables across all sectors of Compass Group UK and Ireland by 15% by 2020
- To ensure that where vegetables are served as a single portion that they are the equivalent of 1/5 a day
- Reformulation of recipes to include more vegetable content wherever possible. This includes recipes from all day parts, made on site and bought in foods.
- To launch a plant forward promotion encouraging and supporting all customers to eat more vegetables. There will be at least one plant forward meal available daily in every site.

This aligns with point 2 on the Commitments Framework

Monitoring

Baseline data has been taken of our procurement figures and will be reported annually to monitor the progress being made. We will formulate all single serve vegetable portions to 80g and put auditing procedures in place to ensure sites are adhering to recipes and serving the correct portions. We will conduct ongoing work with our chefs to get a higher amount of vegetables into our meals. This will be tracked and measured throughout the higher procurement volumes. Plant forward meals will be meals based on foods derived from plants, including vegetables, whole grains, nuts, seeds, legumes and fruits, but with few or no animal products. These will be tracked through our systems to ensure that all sites are providing at least one a day.
