What area of the UK will your commitments impact?

Commitments

Please select the actions that your organisation will be committing to:

Commitment 1

Please give further details of how you will achieve this commitment

Increase the volume (kg) of vegetables served during lunchtime service by 10% by September 2020 in 6-8 of our primary schools (our flagship schools) who are trialling our pledge in order for us to roll this out further within the Borough. We will do this by increasing the amount of vegetables served during lunchtime service (instead of one, both vegetables will be served on the plate); including the increase of vegetarian meals on the menu.  
During lunchtime service we offer a salad cart in all schools where we will look to monitor portions taken at lunch and continue to promote. We will also promote the consumption of vegetables through the Crunch Bunch (Veggie Run App) across the borough. We are working closely with our public health team who work with schools and monitor the Healthy Schools London Awards, they have agreed to add a two vegetable policy for all schools who hold a bronze award or more, starting from September.

Monitoring

Please specify how you will determine your success in achieving this commitment.  
We would like you to measure commitments 2-5 as additional portions sold over the period of your commitment, in comparison to annual levels sold from June 2016 to June 2017.  
We would like you to measure commitments 6, 8 and 9 in terms of the number of people you reach.  
We would like you to measure commitment 7 in terms of the additional monetary value spent in comparison to the period June 2016- June 2017.

We will measure the increase in kg of produce from baseline to completion. Our baseline data will be taken from procurement from September 2018 to September 2019.  
Within the reporting we have also including the amount of wastage produced from vegetables and the salad cart on a daily basis for each schools which we will hopefully use a reduction in wastage.

If you are collecting data, would you be willing to share this with the Food Foundation for our annual monitoring report?   
Is this something you are already doing or is it a new commitment you will be implementing from October 2018?   
When do hope to have implemented this commitment fully?   
Where is this commitment relevant to?

Are you planning to commit to anything outside the 10 commitments in the framework? If so, please give details

Are you happy for us to publish the above information?
