Quick service, Food-on-the-go businesses, casual dining restaurants, workplace canteens and public sector food settings commit to increase the volume of veg they sell, aiming for two portions in every main meal while maintaining commitments to reduce waste (inspiration can be found in our Food Service Compendium).

We will measure the increase in portions of vegetables and salad from baseline to completion. Our baseline data will be taken from portion sales data from July 2018 to June 2019. Year 1 reporting will be from July 2019 to June 2020, in line with the Peas Please reporting year, and compared with the above baseline. We will report the total portions served (80g per portion) and the % increase compared to the baseline.

We will also aim to make sure we do not increase our food waste by serving more veg.
