

# University of South Wales 2020 Pledge

University of  
South Wales  
Prifysgol  
De Cymru

This is a site pledge

This commitment will be implemented  
by June 2023

# 1

Quick service, Food-on-the-go businesses, casual dining restaurants, workplace canteens and public sector food settings commit to increase the volume of veg they sell, aiming for two portions in every main meal while maintaining commitments to reduce waste (inspiration can be found in our Food Service Compendium)

**This aligns with point 4 on the Commitments Framework**

## Commitment Details

By 2021 we aim to increase our vegetable offering at Stilts which is our main food outlet on USW's Treforest campus by 10% and 15% by 2023. We will do this by including two portions of vegetables into main meals as standard, offering more vegetable based options on the salad bar, offering a free veg side with every main meal, and improving the marketing to offer all customers an option to swap Chips or other deep fried products with a vegetable alternative such as salad or vegetables. Another focus will be on the proportion of vegetables that we use in our meat based dishes and also a greater emphasis on meat free Mondays where we will explore vegetable based dishes such as Cauliflower Cheese, Vegetable Chilli opposed to meat alternatives that are currently very popular with Flexitarian/Vegetarian/Vegan customers.

## Monitoring

We will monitor the volumes/kg of vegetables procured annually.

# 2

Quick service, Food-on-the-go businesses, casual dining restaurants, workplace canteens and public sector food settings commit to increase the volume of veg they sell, aiming for two portions in every main meal while maintaining commitments to reduce waste (inspiration can be found in our Food Service Compendium)

**This aligns with point 4 on the Commitments Framework**

## Commitment Details

To tie in with the commitments at our main campus in Treforest we will roll out the incentives to all other food outlets across the USW catering estate from 2021.

## Monitoring

We will monitor the volumes/kg of vegetables procured annually.
