Animal welfare & antibiotics		1.00			
E15	BBFAW tier position or Company has a target for % of animal products certified to high animal welfare standards.	1	S	Tier 3 in BBFAW	BBFAW
E16	Company has a target for, and reports on, zero supply chain use of antibiotics as a prophylactic or growth promoter and to reduce the total use of antibiotics classified as "medically important antimicrobials".	1	S	Animal welfare policy: Feed must not contain ... any antibiotics or hormonal growth promoters. Suppliers are expected to implement our policies regarding the use of antibiotics and medical provision standards across their entire business irrespective of species or geographical location. The use of highest priority CIAs in human health should be minimised and a clear policy for exclusion must be in place by suppliers. A clear policy must exist at farm level for the metaphylactic use (treatment of a group) of antibiotics and should only be used in conjunction with good husbandry practices under the supervision of a qualified vet. The routine use of prophylactics (disease prevention) is not permitted and there has to be formal written justification by a veterinarian when used. A vet can only recommend prophylactic treatment when there is high prevalence of a disease in the area of history of disease on the farm and where it prevents the use of critically important antibiotics. The use of antibiotics, hormones or growth promoting antibiotics is strictly prohibited and will be monitored through animal welfare questionnaires and subject to ad-hoc audit by DPG.	https://investors.dominos.co.uk/system/files/uploads/financialdocs/2020-annual-report-web-edition.pdf https://corporate.dominos.co.uk/Environment https://investors.dominos.co.uk/sites/default/files/attachments/pdf/dpg-environmental-policy-march-2021.pdf
